

## SIX DOCTORS AND TWO JUDGES HAVE GOT THE PANDEMIC CRIMES DOWN PAT

1. An abstract from the *British Medical Journal*, November 13, 2020, says:

Politicians and governments are suppressing science. They do so in the public interest, they say, to accelerate ... diagnostics and treatments.... Science is being suppressed for political and financial gain. Covid-19 has unleashed state corruption on a grand scale....Politicians and industry are responsible for this opportunistic embezzlement. So too are scientists and health experts. The pandemic has revealed how the medical-political complex can be manipulated in an emergency—a time when it is even more important to safeguard science....

First, the membership, research, and deliberations of the Scientific Advisory Group for Emergencies (SAGE) were initially secret until a press leak forced transparency. The leak revealed inappropriate involvement of government advisers in SAGE, while exposing under-representation from public health, clinical care [etc].

2. **Dr Rod Hodkinson, FRCPC**, of Alberta Canada, November 13, 2020, says:

“There is utterly unfounded public hysteria driven by the media and politicians. It’s *outrageous*. [Covid] should be thought of as nothing more than a bad flu season. Masks are utterly useless. There is no evidence base for their effectiveness *whatsoever*. Social distancing is also useless because Covid is spread by aerosols which travels 30 meters or so before landing.

“I’m in the business of testing for Covid. I do want to emphasize that positive test results do *not*, underlined in neon, mean a clinical infection. All that should be done is to protect the vulnerable and to give them all in the nursing homes ... 3000 to 5000 international units of vitamin D every day which has been shown to radically reduce the likelihood of Infection.”

3. **Dr Sucharit Bhakdi**, born 1946, is the retired Chair of Medical Microbiology at University of Mainz, Germany. His father was a Thai diplomat, so Sucharit was educated all over the world. He thought the lockdown was “out of this world.” Anyone who has studied PCR, he says, knows that a PCR test cannot be used to diagnose anything. Yet whenever the test was positive the patient gets labeled Covid. “**It is criminal now to say that these are covid-19 cases.**”

Bhakdi notes that John Ioannidis of Stanford wrote in a peer-reviewed article that was put on the WHO Bulletin – that this virus is no more deadly than a seasonal flu for people under age 70. “This is so little that there is no reason to do a lockdown or anything else.” Anyone who says otherwise is lying. The words at the end of a book that Bhakdi and his wife recently wrote are: “The time has come for *Homo sapiens* to stand up.” Too right!

4. **Rashid Buttar, OD**, was a surgeon in the US Army before becoming a local doctor in North Carolina where many of his patients are autistic children. He has had many conflicts with the medical establishment over the excellent alternative treatments he provides for autism. Thus he was able to smell the rat immediately.

Buttar says it is medically wrong to wear a mask. Also, the point of the 6-foot social distancing is to allow surveillance of individuals which is not possible when we crowd

together – something he knew from his Army work. On a YouTube video of November 2, 2020, says: “If we don’t act soon *we are all going to be chipped like cattle.*” This is true. The vaccine is not like the old polio shots. It’s a high-tech chip with all data about you on it. Buttar adds: “With knowledge comes power.” Yay!

**5. A Portuguese Appellate Court** Ruled that the lockdown is unlawful:

*“Given how much scientific doubt exists — as voiced by experts, i.e., those who matter — about the reliability of the PCR tests, given the lack of information concerning the tests’ analytical parameters, and in the absence of a physician’s diagnosis supporting the existence of infection or risk, there is no way this court would ever be able to determine whether C was indeed a carrier of the SARS-CoV-2 virus, or whether A, B and D had been at a high risk of exposure to it.”*

**6. Retired UK Supreme Court Justice Jonathon Sumption, OBE**, born 1948, said an online lecture about Rule of Law, for Cambridge University, “the British public has not even begun to understand the seriousness of what is happening to our country.” The website [legalcheek.com](http://legalcheek.com) notes:

“Lord Sumption wowed a virtual audience last night with a hard-hitting attack on the government’s coronavirus policies, accusing ministers of deliberately stoking up fear and acting with a ‘cavalier disregard for the limits of their legal powers.’ [He] warned that British society was becoming ‘totalitarian’ and argued that the government had no power to pass lockdown regulations under the Public Health Act.”

Thank you for listening.
